## What is Swift IP?

Swift IP is Premises Networks comprehensive business telephony service that provides a broad range of powerful exchange functions to small and mid sized enterprises. Swift IP is a hosted system that offers businesses and branch offices a complete state of the art IP telephony service. Telephones; fixed, portable or soft phones, are connected directly to the local area network (LAN) and are provided with advanced private exchange functionality. The administration, e.g. moves-adds-and-changes, is performed with user friendly interfaces, by the end user via a web portal. Swift IP provides customers with modern customer-oriented telephony, off-loads the added responsibility of purchasing phone system equipment and lowers the company's total communication cost significantly.

## The benefits of Swift IP

- Fully tested and approved to work with Ericsson SIP terminals and dialog 1400 range.
